

NEW WAVE - OUR FISH SUPPLIER

New Wave Seafood are located in Gloucestershire, they also have a base on the Lizard Peninsula in Cornwall. This allows direct access to landing from local day boats whom they purchase stock off daily alongside 5 main fishing auctions.

Environmental Commitment:

New Wave are committed to reducing environmental impact where possible and constantly strive to make sustainable improvements. They try to buy fish that are line caught by small day boats, minimising the impact on the marine environment.

They operate in compliance with all the relevant environmental legislations and strive to use relevant and best environmental practices.

New Wave support the Responsible Fishing Scheme (RFS), who are an independent certification scheme designed to promote and recognise good practice in the fishing industry. They ensure effective conservation and management of living aquatic resources and aim to give priority to vessels committed to this scheme.

We work with New Wave to ensure we are using in season, low risk species which hold the correct certifications.
