

Operational Policy – Soy

This policy applies to all operations that Oscar's French Bistro and Steakhouse undertakes. Also relevant to all suppliers including third parties that provide goods and services to the organisation whether new or existing.

Oscar's is committed to reducing the impact soy has on the environment and will continuously strive to improve the sustainability of the ingredients we source for food and that is present in feed. We want to ensure that all soya used is cultivated in a responsible and sustainable manner.

We aim to ensure soy has been produced in line with responsible production standards:

- Protection of valuable ecosystems
- Prevention of illegal deforestation
- Protection of water resources
- Compliance with labour laws, local environmental and land title
- Good agricultural practices

We are aware that some pork and poultry produce is fed on soy based feeds, this is an area our supplier is currently working on. A suitable alternative is required before soy is removed from fed product.

Transparency with our suppliers is essential in order to improve soy within our supply chain. We encourage our suppliers to reduce/ sustainable source all soy products that are present.
