

Sustainable Fishing

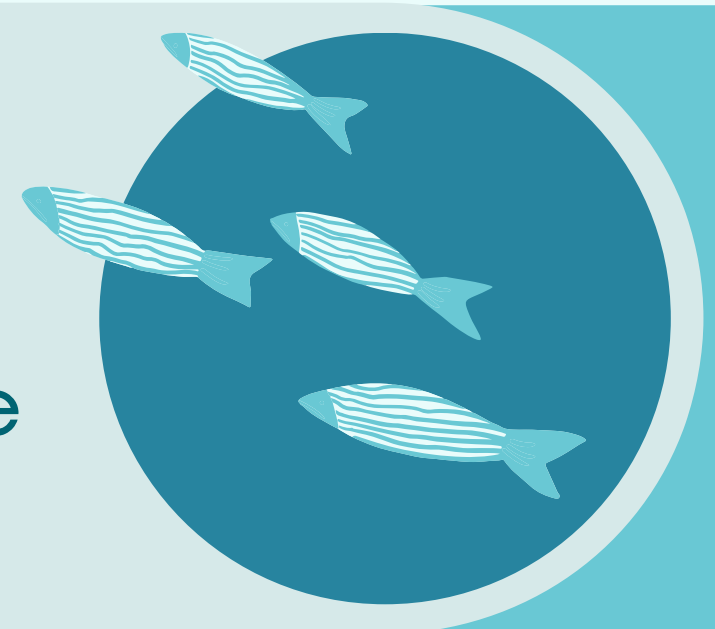

Transparency

We like to know where all our fish comes from and that they are from sustainable sources.

MCS Fish Guide

We aim to only source fish rated 1-3 on the MCS **Good Fish Guide**, which ensures they are not at vulnerable levels.

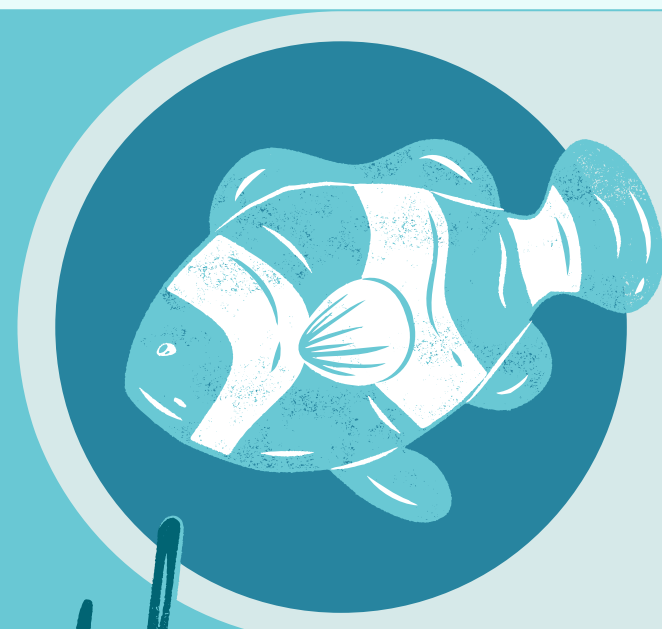

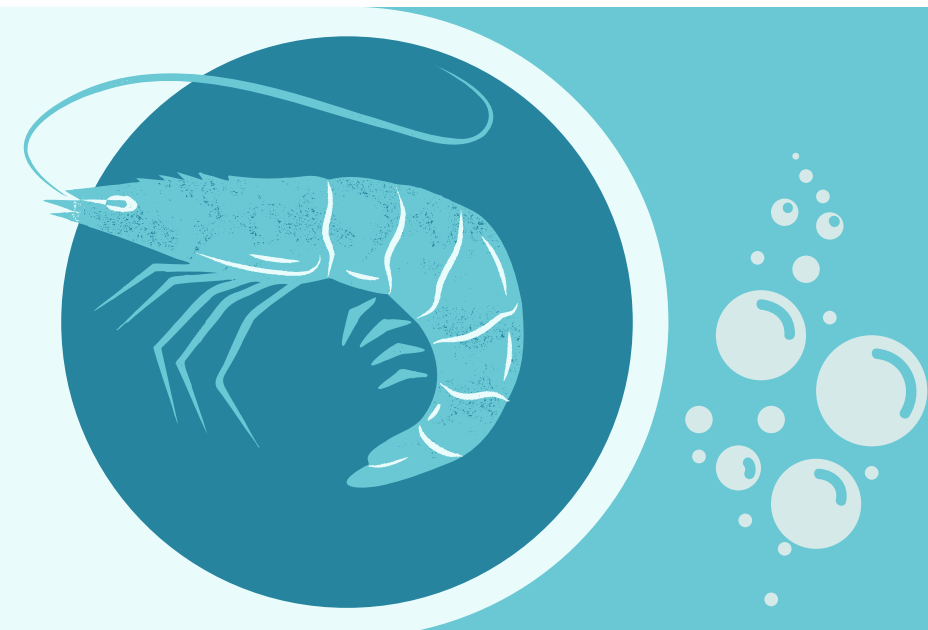

Supplier smart

We work closely with our supplier to receive the relevant information regarding the products we order - traceability is key.

Fish Responsibly

Ensure the correct capture methods, boat safety and fishing regulations are followed.

Farm vs. wild

We go with the advice of our supplier, offering both wild and farmed fish. We choose the fish for their quality and sustainable factors.
